

Pavilion Pediatrics Families,

Just a quick note to let you know we have started to receive small amounts of the updated Covid vaccine, which is recommended for children 6 months and older. If you would like your child to receive the vaccine, please call the office to schedule an appointment. We will start booking Covid vaccine appointments the week of November 21st. Your child can also receive the vaccine at his or her well visit, pending availability. Stay safe, healthy, and keep in touch.

As always, reach out with questions!

Thank you,

Your Providers and Staff at Pavilion Pediatrics
