

Pavilion Families,

We are happy to share with you the good news that COVID vaccines have now been approved for children ages 6 months through 5 years of age. Please see this attached article for related information and answers to common questions. While we anticipate receiving vaccine from the state very soon, we do not yet have vaccines for this age group in our office. As soon as we know when we will have vaccine, we will communicate with you via email and social media the details on how and when to schedule. As you know, our phone volume has been very high lately as we manage regular and COVID-related patient needs. We ask that you kindly refrain from calling the office to inquire about vaccine availability. We promise to be swift and thorough in getting information out to you as soon as we have it. And finally, Happy Father's Days to all our awesome Pavilion dads. We love seeing you at the office and partnering with you in the care of your children!
