

November 10, 2022

Pavilion Families,

It is time for kids ages 5-11 to get a boost! We now have updated, bivalent Covid booster vaccines available for kids ages 5-11. Children are eligible for a booster if it has been at least two months since the completion of their primary series, or since their last (monovalent) booster. Please call the office with questions or to schedule a vaccine visit. Also, if you haven't already, now is the time to get your flu vaccine. We are seeing a LOT of flu. Please protect yourself and your children. Stay healthy out there!

Thank you,

Providers and Staff of Pavilion Pediatrics
