

## Mask Policy Update

In accordance with Johns Hopkins Medicine, we are updating our masking guidelines to the following:

1. Masks remain mandatory for patients (or accompanying family members) with fever, nasal congestion, cough, or any concern for Covid.
2. Given the preponderance of these sick symptoms at our Quick Sick hour, we recommend continued masking at Quick Sick for staff, patients, and families.
2. For all others, masking is recommended for your protection, but not required.
3. During well visits and non-respiratory illness visits, patients and their families are welcome to come without a mask. Your providers and medical assistants may or may not be masked, based on their circumstances or preferences.
4. If you prefer that your provider and medical assistant wear a mask, just let us know when you check in, and we will be happy to do so.
