

Our goal is to keep all of our patients, families and staff healthy throughout this pandemic.

To adhere to the governor's requirement face masks or face coverings are to be worn. Face masks are not recommended for children ages 2 years and under, please cover infants and children's carriers and strollers with blankets when entering the building. We ask that you check in from your car, by replying "Here" to our text chat through Phreesia or by calling the office at 410-583-2955. Please have your insurance card and payment information ready and available with you in the car. We will then instruct you how to come to our side door to be ushered by staff into an exam room.

In an effort to stay connected with families and remain attentive to your children's health and well-being in this challenging time, we have implemented Telemedicine visits. It is obviously not ideal but under the circumstances we think it gives us a chance to connect and check in about health and well-being of your child. We offer Telemedicine visits for all non-vaccine related well visits as well as sick visits, consults, follow ups and more.

We are offering Doxy.Me for all Telemedicine visits, please call our office and our front desk will be happy to set up a Telemedicine visit with you.

For Telemedicine Well Visits we are asking, if possible, to have the following information available for us:

- A list of current medications.
- Any new medical conditions.
- A list of any questions you may have.
- Height
- Weight
- Pulse [Click here for instructions](#)
- Head Circumference (Infants and children ages 2 years and younger) [Click here for instructions](#)
- PHQ-9 (13 years and older) Please complete prior to your scheduled Telemedicine visit through our Phreesia pre-registration.
